Piyush Rajendra Ladukar

Full Stack Developer | Python | Machine Learning | Building in GenAI & Agentic AI
| +91 8668720984 | work.piyushladukar@gmail.com | Portfolio | Github | Linkedin

SUMMARY

Final-year B.Tech CSE student with hands-on experience in backend development, building secure REST APIs, and developing scalable, data-driven applications using real-world datasets. Passionate about AI and currently building LLM-powered applications while expanding expertise in Generative AI, Retrieval-Augmented Generation (RAG), and AI agents. Strong foundation in Python, backend systems, and problem-solving, with a proven track record of delivering end-to-end projects. Seeking Backend Developer, Python Developer, or AI/ML Engineer internships and full-time opportunities.

EXPERIENCE

IVYHUTS Pvt. Ltd. — **Forward Deployed Engineer Intern**
Jul 2026 – Present | On-site

- Developed **15+ full-stack features** using React, Next.js, TypeScript, Node.js, and MongoDB for student housing and CRM applications.
- Built an **AI-powered CRM assistant with 10 read-only tools** using Groq LLMs and SSE, featuring role-based access, token budgets, and audit logging.
- Integrated **13+ REST APIs** and consolidated **51 API routes into 9 Vercel Functions**, resolving deployment limitations.
- Optimized **8+ database models** and implemented secure sessions, role-based access control, and MongoDB-backed shared storage.
- Delivered **110+ production-ready code changes** across 3 repositories through cross-functional collaboration and Git.
- **Stack**: React, Next.js, TypeScript, Node.js, MongoDB, Groq API, OpenAI SDK, Vercel, Tailwind CSS, Jest, Vitest, Git, GitHub.

ESM Elixir Statergic Management Pvt. Ltd..— **Backend Developer Intern**
Aug 2025 – Oct 2025 | On-site, Nagpur

- Built and maintained **12 REST API endpoints** using Node.js, Express.js, and PostgreSQL for internal enterprise applications supporting CIRP/IBC advisory workflows. [Verify: endpoint count]
- Implemented JWT Authentication and RBAC-based authorization systems, improving secure access control and backend security workflows.
- Collaborated on secure enterprise systems integrating authentication, role management, and database-driven services.
- **Stack**: JavaScript (Node.js, Express.js), JWT, RBAC, REST APIs, SQL, MongoDB, Git, Postman

PROJECTS

Orbit — AI Job Application Automation Platform

- Developing an end-to-end AI automation platform using n8n, Python, and LLMs to automate job discovery, relevance scoring, and personalized application generation.
- Implementing multi-step workflow orchestration for LinkedIn job aggregation, duplicate removal, profile-based job matching, ATS-optimized resume generation, cover letter creation, and email drafting, with planned Gmail API and Google Sheets integration.

SecondBrain — Personal AI Agent & RAG System

- Building a Retrieval-Augmented Generation (RAG) pipeline with LangChain and a vector database to power a personal knowledge-agent system with LLM-based reasoning and tool calling.
- Designing agent memory and multi-step workflow logic for context retrieval, embeddings generation, and structured LLM responses.

LokDrishti — Parliamentary Intelligence Platform | Github

- Built a full-stack civic data platform scraping and structuring Lok Sabha MP data (attendance, debates, criminal records) for **543 MPs**; deployed Flask APIs and a React dashboard via Supabase with OAuth.
- Implemented analytics dashboards and REST APIs to deliver searchable insights, MP performance metrics, and structured parliamentary intelligence for data-driven civic analysis.

PUBLICATION & OPEN SOURCE

- **Anomax** —Developed a machine learning model to detect anomalous electricity consumption patterns; published findings in the **International Journal of Versatile Research and Analysis (IJVRA).**
- **Rajniti** — contributor to an **open-source civic-tech platform** for structured **political data and analytics.**

SKILLS

Languages: Python, JavaScript, SQL
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT, OAuth, RBAC
AI/ML: Machine Learning, Computer Vision, Pandas, NumPy, Scikit-learn, OpenCV
Gen AI : LangChain, RAG, Vector Databases, LLM APIs, Embeddings, Agentic AI
Databases: PostgreSQL, MySQL, MongoDB, Supabase, SQLAlchemy
Tools & Platforms: Git, GitHub, Docker, Linux, Vercel, Render, Postman

EDUCATION

Jhulelal Institute of Technology, Nagpur — B.Tech, Computer Science

CGPA: 8.4 | July 2023 – June 2027

ACHIEVEMENTS

- President of HackWithIndia Chapter of JIT
- Participated in 12+ hackathons; organized 4 hackathon events as Event Head.
- Achieved 2 Gold Medals at the National Karate Championship (2019) among 250+ athletes.
