

Piyush Rajendra Ladukar

Full-Stack Engineer | Backend | Python | AI | Data Science

EXPERIENCE

ESM Pvt.ltd| Backend Developer Intern | On-site

Aug 2025 - Oct 2025

ESM Elixir (Formerly Dysmech Consultancy Services) is a company focused on Corporate Insolvency Resolution Process (CIRP), IBC advisory, Digital Engineering, IT solutions, and IoT product development

- Developed and maintained secure REST APIs using Node.js, Express.js, and PostgreSQL for internal enterprise applications and backend services.
- Implemented JWT Authentication and RBAC-based authorization systems, improving secure access control and backend security workflows.
- Collaborated on secure enterprise systems integrating authentication, role management, and database-driven services.
- **Tech-stack** -JavaScript(Node.js, Express.js), JWT, RBAC, REST APIs, SQL, Git, GitHub, Postman, MongoDB

PROJECTS

[LokDrishti](#) | [GitHub](#)

AI-based civic intelligence platform for analyzing Lok Sabha MP data including attendance, debates, questions, and criminal records. Built scraping pipelines, structured APIs, analytics dashboards, and full deployment workflow for public parliamentary data analysis.

Tech-stack:-Python, Javascript(React.js, Node.js), Flask, Numpy, Pandas, BeautifulSoup, Postman, Supabase, OAuth

[Why-Farmers-Suicides?](#) | [GitHub](#)

Data analysis platform focused on Maharashtra farmer suicide trends from 2014-2023. Built dashboards and district-wise/state-wise visual analytics to study debt, crop failure, weather conditions, and financial stress patterns.

Tech-stack:-Python, Javascript(React.js, Node.js), Flask, Numpy, Pandas, BeautifulSoup, Postman

[AatankDrishti](#) | [Github](#)

Large-scale terrorism data visualization dashboard built using the GTD dataset with 181K+ incidents across 200+ countries. Developed interactive analytics dashboards, trend visualizations, and large dataset processing pipelines.

Tech-stack:-Python, Javascript(React.js, Node.js), Flask, Numpy, Pandas, BeautifulSoup, Postman

[Anomax](#) | [Github](#)

AI-driven anomaly detection system for identifying unusual electricity consumption behavior using machine learning techniques. Published research paper in the International Journal of Versatile Research and Analysis (IJVRA).

Nagpur, India

[\(+91\) 8668720984](#)

[Email](#) | [Github](#) | [LinkedIn](#)

SKILLS

Languages: JavaScript, Python, SQL

Front-end: React.js, HTML, CSS

Back-end: Node.js, Express.js, Flask, Fast API

Databases: MySQL, PostgreSQL, Supabase, SQLAlchemy

AI: Pandas, NumPy, Scikit-learn, OpenCV, Pyzbar, BeautifulSoup

Tools&Platforms : Git, GitHub, Docker, Vercel, Render, Postman, UptimeRobot

UX/UI Design: Figma, Canva

EDUCATION

**Jhulelal Institute Of Technology,
NAGPUR | 8.4 CGPA**

July 2023 - Present

OTHER PROJECTS

- [QR-SCANNER](#) : Real-time QR code scanning application with QR detection, decoding, and clipboard utilities.
- [Blocks By Pi](#) : Computer vision-based hand gesture recognition and virtual block placement system using OpenCV.
- [SecondBrain](#) (In Development) : Personal AI ecosystem focused on AI agents, RAG pipelines, vector databases, and intelligent workflows.

OPEN SOURCE CONTRIBUTIONS

1. [Rajniti](#) - Contributing to an open-source political and civic-tech platform focused on structured political data, analytics.

ACHIEVEMENTS

- Participated in 12+ hackathons
- Conducted 2 hackathon events as Event Head.
- Built and deployed multiple full-stack and AI-based applications
- Achieved 2 Gold Medals at the National Karate Championship (2019) representing Maharashtra among 250+ athletes
